

Graffiti Eater Odour Eater

DESCRIPTION

Graffiti Eater Odour Eater is a neutralising chemical designed to neutralise the contaminated surface and work as an air freshener that masks the source of the odour

APPLICATION

Depending on the contamination of the area a usual dilution would be 1:4 being 250ml to 1 litre of water. For a stronger solution the dilution would be 1:1 being 500 ml to 500ml of water. Spray on with a hand pressurised spray unit or hand pump spray. Spray liberally on the surface to be neutralised and immediately leave the room trying not to inhale the vapour of the odour eater.

Keep out of the room and keep the room closed up for 12 hours. If after one month the odour re appears a second treatment may be required.
